As a self-employed entrepreneur, I help clients with their cool idea into an interactive and solid web application. I mostly use Laravel Framework on my freelance project.

Education

University of Technology Yogyakarta

2017 - 2022 BACHELOR'S DEGREE IN INFORMATION SYSTEMS

Learn more in the world of programming starting from basic algorithms to advanced ones using C++ and Java until be interested in web development, in the second semester deepening the world of web development using html, css and javascript. I lead a final project to finish the last semester and build HRMS to fulfill my final project in college. I took a semester leaves in my 5th semester and use it for working full-time as a web developer and continue my study on the next year while working fulltime, but I still have a good GPA score tho'.

GPA : 3.64

SMA Negri 6 Cirebon

2015 - 2017

Get to know and interest the world of programming and start learning html self-taught
